SUMMARY

Highly motivated and fast learning Client Solutions Architect with 4+ years of experience in providing high-level solutions to clients, working in fast paced environments, writing clean and maintainable code, and adapting to any new systems introduced while maintaining knowledge in new technologies and tools, such as leveraging AI to further improve projects and my team.

Directly involved in 500+ client initiatives and over 100 million dollars in sales generated. Expertise in manipulating environments or systems in place to drive higher customer satisfaction.

PROFESSIONAL EXPERIENCE

Web Integrator

Plusgrade | Jul 2025 - Present

- Turning partner and product requirements into concrete configuration, database/rule changes, feature activations, and validating them end-to-end in stage and production.
- Collaborate with other teams to clarify requirements, align on scope, problem solve, and to close the loop on partner feedback.
- Leveraging AI to build and maintain a new testing tool for the company to utilize; saving 100+ hours of work per project.

Web Developer

Plusgrade | Oct 2023 - Jul 2025

- Used React, HTML, SCSS, and Javascript to construct engaging landing pages, dynamic banners, and countdown clocks that enhanced user experience and monetized user engagement.
- Applied diverse partner objectives, leveraging programming expertise to boost customer acquisition and revenue by developing and optimizing tailored promotional offers.
- Communicated effectively with my team through Agile practices as well as engaged in interdepartmental collaboration by providing feedback for transparent updates to projects.

Junior Full Stack Developer

Clean Earth Foundation | Jul 2022 - Oct 2023

- Collaborated with founders to develop a Clean Earth non-profit organization website that utilized its own server and database.
- Created REST API endpoints and used HTTP methods for transferring data.
- Handled the full-stack process for their website including the front-end, back-end and design/implementation.

EDUCATION

Lambton College

Computer science
Sep 2020 - Apr 2022

BrainStation

Web Development
Sep 2022 - Dec 2022

Winner of LoyaltyOne hackathon challenge which included a UI specialist, a data expert and I all collaborating on how to make Airmiles enticing for Gen-Z.

SKILLS

- Proficient with React, JavaScript/HTML/SCSS, Python, SQL/MySQL, Java controllers, Node.js, Express.js, REST API's.
- Ability to work in scrum/agile environments with tools such as Git, Salesforce, Jira, AWS, Grafana, Docker, and Splunk.
- Adept at understanding the clients needs and ensuring their vision is met in a timely fashion.
- Strong ability to deliver on tight deadlines and to adapt when needed.
- Leverage best testing processes to improve the cleanliness of code.
- Excellent communication and organization skills from running my own landscaping company as well as the interdepartmental communication that Plusgrade relies on.
- Eager to learn and easily adaptable. Excited to use new technology, learn new skills and to fill role gaps when needed.
